

ENVIROCLEAR

COMPLETE ORGANIC SEPTIC SYSTEM TREATMENT

How Triple7 EnviroClear solves the problem.

Triple7 EnviroClear is a unique surfactant formulation that destroys odours and breaks down grease and fat deposits, allowing them to be released from the system.

Triple7 EnviroClear cleans and deodorises drains before they enter the septic system, and improves drainage in leach drains and soak wells. **Triple7 EnviroClear** restores efficiency and maintains aerated waste treatment and septic systems without using harmful chemicals.

What is Triple7 EnviroClear?

Triple7 EnviroClear is a completely non-toxic, fast acting organic solution for septic tank and odour control treatment.

A POWERFUL ORGANIC LIQUID THAT...

Environmentally responsible

Readily biodegradable

Odourless

Convenient liquid formulation

ENVIROCLEAR

A COMPLETE PORTABLE TOILET & SEPTIC TANK TREATMENT

Do you have?

- Blocked pipes & drains
- Water-logging near leach drains
- Odours in drains & grease traps
- Poor sludge break-down
- Grease & fat deposits
- Frequent pump-outs
- Expensive plumbing bills.

Cause of Problems

Septic problems generally arise because of an imbalance between the natural bacteria that digest waste and the amount and type of waste they consume. Inefficient septic/waste systems can be expensive to rectify and also cause many health issues.

Traditional cleaning chemicals kill desirable sewer bacteria.

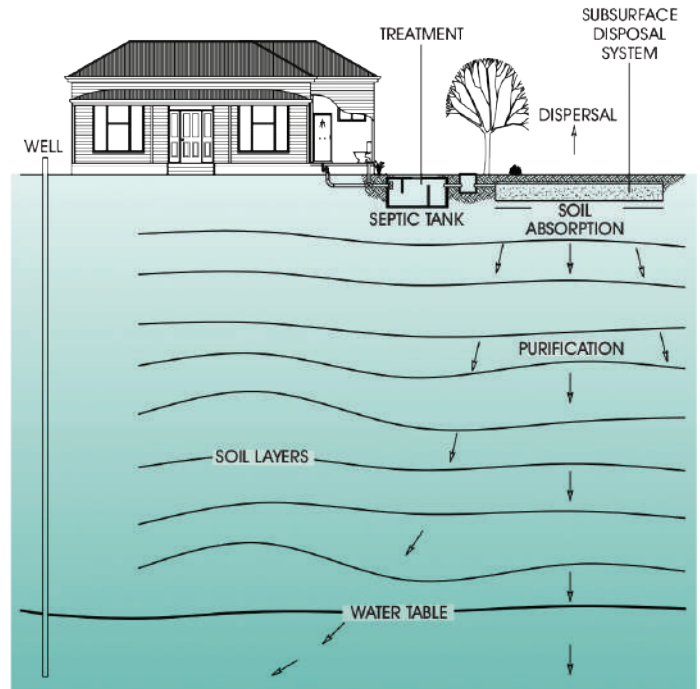

Septic overload high use of facilities eg. public toilets, mine sites and factories.

Grease & fat deposits restaurants, food processing plants and canteens.

Applications

- Neutralises odours in drains & grease traps
- Prevents waterlogging near leach drains
- Assists sludge breakdown
- Controls grease & fat deposits

Part No #	Description	Size
AAECL-1	Triple7 EnviroClear	1 Litre
AAECL-5	Triple7 EnviroClear	5 Litre
AAECL-20	Triple7 EnviroClear	20 Litre
AAECL-200	Triple7 EnviroClear	200 Litre
AAECL-BB	Triple7 EnviroClear	1000 Litre

Benefits of using Triple7 EnviroClear

- Destroys odours
- Stimulates sewer bacteria
- Assists sludge break-down
- Improves drainage and clogging problems in leach drains & soak wells.
- Clears blocked pipes of organic deposits
- Reduces health risks
- Improves water flow
- Enhances septic & waste treatment systems
- Reduces plumbing costs
- Protects eco-systems & waterways
- Saves money.
