

OzoneMAX is the Perfect Complement to MineralPURE

When combining the OzoneMAX (OZ-50) system with the MineralPURE (R-40 or RC-50) ionization system, you will have the most advanced alternative sanitizing system available. The ionization system will help control algae, bacteria, and viruses, while the ozone provides the oxidation needed. This will allow for the maximum reduction of chlorine levels along with the MineralPURE ionizer.

RC-50 & OZ-50 COMBO

Clearwater Pool System Complete

50,000 gallon pools

RESIDENTIAL POOL MODELS

RC-50 – Platinum Deluxe Ionization System

- Our most sophisticated ionizer ever
- Handles up to 50,000 gallon pools
- Full LCD digital readout display
- Includes test kit & electrode
- Built-in ScaleBlaster® for lime scale control
- 5 - year warranty, NSF & UL listed

RC-50

50,000 gallon pools

OZ-50 – Pool Ozone System

- Vacuum Ultraviolet Ozone System
- Handles up to 50,000 gallon pools
- Heavy duty metal enclosure
- Includes Venturi Manifold Assembly
- Amazing water clarity
- Competitively priced
- 1 - year warranty

RESIDENTIAL POOL & SPA MODELS

R-40 – Economical Pool Ionization System

- Economically-priced ionization system
- Handles up to 40,000 gallon pools
- 6 – settings
- Includes test kit & electrode
- NSF listed
- 5 - year warranty

R-40

40,000 gallon pools

SPA-1R – Spa Ionization System

- Premium spa ionization system
- Handles up to 1,000 gallon spas
- Alternating electrode indicators
- Includes test kit & electrode
- 5 - year warranty

SPA-1R

1,000 gallon spas

OZ-SPA – Spa Ionization System

- Vacuum Ultraviolet Ozone System
- Handles up to 1,000 gallon spas
- Heavy duty metal enclosure
- Includes Venturi assembly
- Amazing water clarity
- 1 - year warranty

First, Stow the Goggles...

For nearly 100 years, chlorine has been perceived as the only way to disinfect water in swimming pools and spas. Yet, this method commonly yields red irritated eyes, dry and brittle hair, itchy skin and bleached out swimsuits.

Chlorine is a strong bleach and is dangerous.

The bottom line is, nobody likes CHLORINE!

Let Nature Do Its Thing

The Clearwater Pool System is nature's way of treating water.

By using two of nature's most precious minerals and ozone as a basis for its technology, our system is the most advanced alternative sanitizing system available.

From Movie Stars to Waterparks

From movie-star dolphins to world-famous waterparks, our unique system has allowed operators to safely reduce their chlorine use dramatically for the past 30 years now.

Wet 'n' Wild Las Vegas

Now, you can truly enjoy swimming without that chlorine residue on you.

The savings in maintenance and chemical expenses alone will pay for the system itself in no time at all! Enjoy amazing water clarity.

MineralPURE®

MINERALPURE - IONIZATION

It is a well-documented fact that copper & silver ions will help control algae, bacteria and viruses.

The ancient Greeks were the first to discover the sanitizing powers of copper.

The Egyptians kept their water in silver containers to prevent contamination.

In 1967, NASA capitalized on this knowledge and developed an ionization system to go aboard the Apollo flights. They did not want to bring chlorine up into space.

Licensed Technology

In 1989, NASA granted Clearwater a license to commercialize from technology.

How MineralPURE Works

The MineralPURE system releases precise amounts of copper or copper/silver ions into the water to help control algae, bacteria & viruses.

The MineralPURE system consists of a computerized control box and a scientifically-designed set of electrodes composed of copper or copper/silver.

A low-voltage DC charge is sent to the electrodes, releasing ions into the water. They flocculate, or form

OzoneMAX

OZONEMAX - VUV OZONE

Ozone is one of the most powerful oxidizers 55 times more powerful than chlorine and reacts faster. It greatly improves water clarity and is controlling cryptosporidium and E. coli while harmful chloramines.

Ozone is produced by oxygen molecules in a lamp. This produces atoms (O₁) that will combine with normal oxygen molecules to form ozone (O₃) which is then dissolved into the water by a venturi manifold - included

How OzoneMAX Works

The OzoneMAX produces a powerful oxidizing Ultraviolet (VUV) Ozone, that is injected into the venturi manifold - included with the

The ozone will oxidize substances in the water and will dissipate by the time it returns back to the pool and reverts back to oxygen.
