## INVERTER TECHNOLOGY

# Oasis Inverter Heat Pumps reduce energy use through their variable speed function.

Where a standard Heat Pump only has 1 speed, meaning it will always draw power at its maximum rate, an Oasis Inverter Heat Pump can dial its power consumption up or down based on the heat demand requirements of your pool. As your pool approaches its desired temperature your Oasis Inverter Heat Pump begins to taper its power consumption, resulting in lower running costs.

Available in 5 Sizes

**Single Phase – Oasis i-12(10kW), Oasis i-17(13kW), Oasis i-19(17kW), Oasis i-24(21kW)**

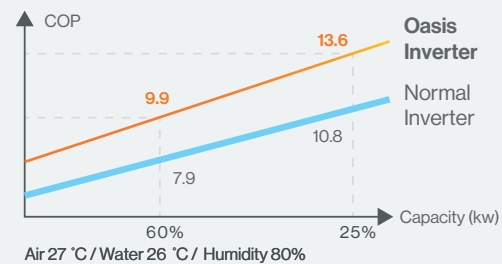

**Three Phase – Oasis i-28T (25kW)**

*Performance kW's quoted above are the Heating Capacity at 19° Air Temp and 26° Water temp*

## KEY FEATURES

- ✓ **DC INVERTER TECHNOLOGY**  
Brushless DC increases performance and enables variable speed
- ✓ **TITANIUM SPIRAL HEAT EXCHANGER**  
Is more efficient than standard heat exchangers and comes with a life time warranty against corrosion
- ✓ **VARIABLE SPEED COMPRESSOR**  
The Mitsubishi compressor provides up to 30% greater efficiency with a COP of up to 8
- ✓ **COMMERCIAL GRADE COMPONENTS**  
Longer lasting components including ABS plastic casing, strong frame structure, rustproof & anti-corrosive
- ✓ **R32 REFRIGERANT**  
Recommended refrigerant, environmentally safe, non-ozone depleting
- ✓ **ELECTRONIC EXPANSION VALVE**  
Advanced EEV technology enables high energy gain returns.
- ✓ **DIGITAL SCROLL TECHNOLOGY**  
Optimises output of the compressor
- ✓ **WHISPER QUIET OPERATION**

### Maintain High COP in Different Ambient Conditions

## Stay silent in your backyard

Oasis Inverter works very quietly thanks to a unique ventilation internal structure. The unit is fitted with a silent mode to make sure you meet your councils noise requirements and keeps your neighbours happy.

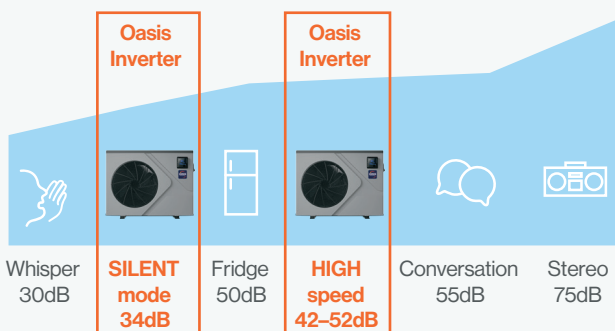

### Silent Mode

Running in Silent Mode the Oasis Inverters's sound pressure level is 34.dB(A) — that's quiet enough to take a nap by the pool.

Silent Mode adheres to local council noise requirements, keeping both you and your neighbours happy.

### High Speed

At high speed operation, the sound pressure level is 42.9dB(A). That's the noise equivalent of an average library.
