

Zodiac Titan Series Fibreglass

ergonomic sand pool filter

Zodiac's Titan Series fibreglass sand filters have been specifically designed for Australian conditions. They are durable, corrosion and UV resistant and extremely user friendly, providing crystal clear water with minimal maintenance.

Durable Construction

The Titan Series fibreglass sand filters are constructed to ensure you receive years of service with minimum maintenance. Constructed with 2 layers to the body of the unit, the inner tank is made from food grade polyethylene and the external tank is constructed from strong woven fibreglass to extend the life of the filter. The filters are also equipped with a robust base to ensure extra stability.

User Friendly

The ergonomic design of the Titan Series fibreglass sand filter makes them easy to operate. Equipped with an ergonomic palm shaped multi-port handle for ease of use, a large sight indicator glass for clear backwash inspection, oil filled pressure gauge for easy inspection of operating pressure, clamp lock design head with 360 degree rotation (ZT500- ZT650 models) for easy installation and a drain plug making maintenance a breeze.

Quality Assurance

All Zodiac Titan Series fibreglass sand filters are quality inspected and factory pressure tested at 400kpa (max working pressure 250kpa).
